Haste Without Waste . . .

Use of Ames "F" Liquid speeds up cementations without any sacrifice in clinical results. Here is a fast-setting liquid you can trust.

Many dentists even in these crowded days still prefer Ames slower setting "C" Liquid, but the fast-setting "F" Liquid can be depended on to produce cementations of the highest clinical quality.

HYGIENIC

COLD CURE

This Brand New Acrylic Repair Material Cures in 20 Minutes at Room Temperature

No heat in any form is required. Repaired dentures undergo no appreciable temperature change, therefore *distortion is entirely eliminated.*

Ideal for:

Repairing fractured dentures — replacing teeth — adding clasps and other repairs.
Shades: Light pink — plain, light pink — mottled. *Both mottled and plain pink produce beautiful clean shades.*

Regular Package		Laboratory Package		1-lb. Package	
4 ounces powder 2 ounces liquid	$5.00	8 ounces powder 4 ounces liquid	$7.50	16 ounces powder 8 ounces liquid	$12.50

Easy To Use

PLASTICOLL IN CARTRIDGES

You can make exact one-piece-impressions in bridgework

Plasticoll In Cartridges is the hydro-colloidal elastic impression material that eliminates air pockets in the cavity-impression in bridgework. The Plasticoll can readily be expelled into the cavity by means of a Lee Smith anesthetic syringe with a special needle available for the purpose.

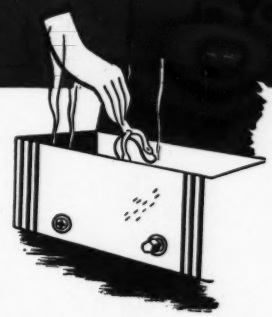
NOW ... INDIVIDUAL TRAYS IN TWO EASY STEPS...
In Your Own Office



1. Immerse in Hot Water

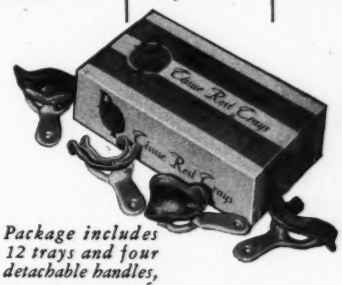
2. Adapt in the Mouth

INSTEAD OF THE USUAL FIVE STEPS	1 Preliminary Impression	2 Impression Delivered to Laboratory	3 Laboratory Pours a Model	4 Laboratory Makes a Tray	5 Tray Delivered to You

In making full impressions, you can now eliminate one visit by the patient, cut down chair time and do away with three steps that waste time and cost you money . . . all by using D-P "Tissue Rest" Trays.

After they are immersed in hot water, "Tissue Rest" Trays can be quickly adapted in the patient's mouth. Easily trimmed or adjusted while warm, they become rigid when chilled.

Intended for any full denture technic using cold materials, "Tissue Rest" Trays are especially designed for D-P Alginate or Three-In-One Cream.



Package includes 12 trays and four detachable handles, an assortment to fit any case.

Write for brochure on "Dry Mouth Technic" using alginates. Discover for yourself the simplicity, speed and remarkably accurate results obtainable.

Contra-Angles

The Change of Life and Other Subjects

One of the better health publications is a pocket-sized magazine, *Your Health*. It carries authoritative articles without distortion of fact and with freedom from spectacular announcements of cure-alls. Many of the magazines for public reading are more concerned with bizarre and extravagant stories of so-called health discoveries than they are with accurate reports of scientific truths. One of the chief offenders is a widely-circulated little magazine that gives lazy readers undigested portions of health hokum. This magazine occupies a position in many readers' scale of values one step removed from holy writ. By an ingratiating style of pontifical pronouncements and a system of ferreting from other peoples' minds, this undigested diet for readers frequently ladles out preposterous health articles. It is good to find a publication like *Your Health* that makes the effort to search out and to publish accurate reports on health subjects.

Charles A. Levinson, D.M.D., of Brookline, Massachusetts, who carries on a one-man campaign as a dental health educator sent me a copy of the most recent issue of *Your Health* that prints his article on the "Care of Teeth in Pregnancy." It is good and every woman should read it. Yes, and every dentist and physician.

Being a confirmed explorer of whatever in print that comes to hand, whether a seed catalogue, a brochure on the Linoleum Foundation, or a high school yearbook, I found myself examining the other articles in the issue. I was particularly attracted to "The Change of Life in Men" and "Let Your Heart be Lazy."

personality
ONLY YOUR VITALLIUM
unlimited

Superb, new esthetics of the Flexseal-built Vitallium case are assurance to you and your patients that there need be no checking that flashing smile, no need for controlling facial expressions to conceal a poorly designed partial denture.

Clasp design of Vitallium appliances is a case in point. There is new fineness and uniformity of taper, fidelity to the contour of the clasped tooth, new in-built strength derived from the designed excellence of Flexseal pre-formed patterns which makes possible clasps that show less metal, are strong, resilient, with excellent functional long life.

VITALLIUM FLEXSEAL AND MICROCAST ARE REGISTERED TRADEMARKS

Flexseal
